PROFESSIONAL SUMMARY

Data Analyst with 2 years of experience in transforming complex datasets into actionable insights using SQL, Python, Tableau, and Snowflake. Experienced in conversational AI analytics, user behavior analysis, automated reporting, statistical analysis, and data modeling, with a strong track record of improving operational efficiency and supporting data-driven business decisions.

WORK EXPERIENCE

Prodapt Solutions, India | Data Analyst

October 2021 – August 2023

- Analyzed customer service chatbot logs in **Snowflake** using **SQL** and **Python** to identify user drop-off trends, providing data-driven insights for product changes that reduced user abandonment by **20%**.
- Designed **Tableau dashboards** tracking chatbot KPIs—intent recognition accuracy, escalation rate, session duration, and self-service resolution—for real-time visibility across product and engineering teams.
- Partnered with product and engineering teams to evaluate chatbot performance using **A/B testing** and **statistical analysis**, validating a new prompt structure that improved self-service resolution by **25%**.
- Automated daily chatbot telemetry pipelines in **Snowflake** using **dbt**, converting raw interaction data into analytics-ready datasets and reducing manual reporting turnaround time by **30%**.
- Maintained **dbt models** and **SQL** transformation logic in **GitHub**, documenting data sources and dependencies to improve data quality, governance, and lineage across chatbot reporting workflows.

Tech Fortune Technologies, India | Machine Learning Intern

March 2021 – April 2021

- Developed a machine learning classification model in **Python** and **scikit-learn** to predict wine quality across 1,599 samples, comparing **Random Forest**, **SVM**, **KNN**, **Decision Tree**, and **Logistic Regression** models resulting in **90%** test accuracy.
- Engineered an end-to-end **ML pipeline** using **StandardScaler**, **GridSearchCV**, **cross-validation**, and an 80/20 train-test split, achieving **88.5%** cross-validation accuracy while preventing data leakage and improving model generalization.
- Performed **exploratory data analysis (EDA)** using **Pandas**, **Matplotlib**, and **Seaborn** to identify feature relationships and class imbalance, then restructured the target into a binary classification problem for more actionable predictions.

PROJECTS

E-Commerce Customer Behavior & Product Demand Analytics | [GitHub](#)

- Analyzed **30M+** e-commerce transactions using **Python**, **Pandas**, and **NumPy**, performing **EDA**, **RFM** segmentation and **K-Means clustering** to identify purchasing patterns and customer segments for targeted retention and marketing.
- Trained and evaluated **Logistic Regression**, **Decision Tree**, and **Random Forest** models using **scikit-learn** to predict product demand, achieving a **0.84 ROC-AUC** with **Random Forest** and generating insights to support inventory and demand planning.

Secure AI Governance Engine | Python, GPT-4o, LangChain, LangGraph, ChromaDB, Docker, RAG, OpenAI API | [GitHub](#)

- Developed a production-ready **RAG pipeline** using **Python**, **GPT-4o**, **LangChain**, **LangGraph**, and **ChromaDB**, applying document chunking, embeddings, and vector search to reduce prompt token usage by **80%**.
- Applied agentic workflows and tool-use patterns with **ReAct agents** to deliver a compliance reasoning system with **100%** citation groundedness and **91%+** accuracy, supported by 28 unit tests and 5 integration tests.

Cloud Native Webapp | Python, FastAPI, Terraform, Packer, GitHub Actions, AWS | [GitHub](#)

- Built a scalable cloud-native backend using **Python**, **FastAPI**, and **RESTful APIs**, integrating **AWS** services including S3, CloudWatch, Route 53, ACM, RDS, ALB, and IAM.
- Automated secure infrastructure and zero-downtime deployments using **Terraform**, **GitHub Actions**, Packer-built AMIs, Auto Scaling Groups, VPCs, KMS encryption, security groups, centralized logging, and CloudWatch metrics.

SKILLS

Languages & Databases: Python, SQL, R, PostgreSQL, MySQL, Oracle, MongoDB, PL/SQL, Excel

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, FastAPI, Jupyter Notebooks

Cloud Platforms: AWS (EC2, S3, Lambda), Azure, Snowflake

Tools & Orchestration: dbt, Airflow, Docker, Git, GitHub, Power BI, Tableau, Jira

EDUCATION

Master of Science in Information Systems | Northeastern University, Boston, MA

May 2026

Bachelor of Engineering in Information Science | Jyothy Institute of Technology, Bangalore, India

June 2021
