## PROFESSIONAL SUMMARY

Front-End Engineer with 2+ years of experience building fast, responsive web applications using React.js, Next.js, and TypeScript. I focus on creating smooth user experiences and have improved page performance by up to 35% and increased engagement by 20%. I enjoy turning design ideas into clean, user-friendly interfaces and continuously refining them through testing and feedback.

## WORK EXPERIENCE

### Prodapt Solutions, India | Software Engineer

October 2021 – August 2023

- Built responsive web applications using JavaScript, Next.js, Tailwind CSS, and Material UI, driving a 20% increase in user engagement across telecom customer platforms.
- Designed and integrated RESTful APIs using Axios to support real-time data flow across billing and service management systems, improving operational efficiency and reducing support requests by 25%.
- Improved system performance by leveraging advanced optimization techniques such as code splitting and lazy loading, reducing load time by 35% and maintaining Lighthouse scores above 90.
- Partnered with cross-functional teams in an agile environment, transforming Figma and Balsamiq wireframes into production-ready UI components, resulting in a 20% faster feature delivery cycle.
- Validated UI functionality using Jest and conducted usability testing aligned with user-centered design principles, reducing UI defects by 30% and enhancing overall user experience.

### Tech Fortune Technologies, India | Front End Engineer Intern

March 2021 – April 2021

- Built responsive UI components using React.js, TypeScript, and Redux, improving cross-device compatibility and reducing UI inconsistencies by 20%.
- Implemented state management using Redux Toolkit and optimized rendering performance, reducing component load time by 25%.
- Collaborated on prototyping and interaction design using Framer and Notion, contributing to design systems and improving feature clarity during development cycles.

## PROJECTS

### Northeastern Library App | (Balsamiq, Figma)

- Redesigned a mobile-first library application, enabling key user workflows such as room booking, rentals, and event management through improved information architecture and user flows.
- Conducted end-to-end UX research including user interviews, surveys, and usability testing with 15+ users to identify pain points and prioritize features using MoSCoW methodology.
- Improved navigation and user experience by iterating through high-fidelity Figma prototypes, reducing study room booking steps by 40% and increasing task completion rates.

### Hustle Hub | (HTML5, CSS, JavaScript, React.js, Node.js, REST APIs, MongoDB) | [GitHub](#)

- Engineered a full-stack freelancing platform using React.js and Node.js, streamlining client-freelancer engagement via responsive UI and RESTful APIs, and processing 25+ successful transactions within the first month.
- Integrated secure payment processing using Stripe and designed scalable MongoDB data models to support transaction and contract workflows.
- Devised and launched email notifications, coupled with Progressive Web App (PWA) features enhancing offline access and reliability.
- Designed modern, responsive UI components using Material UI, improving usability and cross-device compatibility.

### Smart Health Management System | (Java, Java Swing) | [GitHub](#)

- Built a multi-module healthcare management application using Java, supporting patient records, inventory, lab diagnostics, and vaccination workflows.
- Streamlined doctor-patient interactions by implementing features such as registration, vitals tracking, lab report management, and automated notifications.
- Improved operational efficiency by designing structured workflows for healthcare services and data management.

## SKILLS

**Languages & Core:** JavaScript (ES+), TypeScript, HTML5, CSS3, Java, Python

**Frameworks & UI Development:** React.js, Next.js, Redux, Context API, Tailwind CSS, Bootstrap, Material UI, Responsive Design, Node.js, Express.js, Fast API, Hooks, Server-Side Rendering (SSR), Static Site Generation (SSG), Component-Based Architecture, Micro Frontends.

**APIs, State & Performance:** REST APIs, Axios, Fetch API, JSON, Redux Toolkit, Code Splitting, Lazy Loading, Web Performance Optimization

**Testing & Tools:** Jest, React Testing Library, Git, GitHub, Webpack, Vite, npm, Yarn, Jira

**Design & UX:** Figma, Framer, Balsamiq, Notion, Prototyping, Wireframing, User-Centered Design, Visual Design, Interaction Design, Information Architecture, Design Systems, User Research, Usability Testing, Competitive Analysis, Accessibility Design

## EDUCATION

**Master of Science in Information Systems** | Northeastern University, Boston, MA

May 2026

**Bachelor of Engineering in Information Science** | Jyothy Institute of Technology, Bangalore, India

June 2021
